

# Gas Detector

Wireless

## MD-2006RF

- New Nanotechnology sensor.
- Automatic reset, it will disconnect automatically, when obviate alarm.
- Gas detected: coal gas, natural gas, LPG(liquefied petroleum gas).
- Automatic fault detection.
- With solenoid valve drive functions, automatic or manual on / off solenoid valve

The MD-2006R gas detector features:high sensitivity and stable reliability,compact size, It has a built-in transmitter to send an alarm signal, and has a buit in back up battery.

## Specification

### Overview

Display Blue backlit LCD display

Power 220V

Transmission frequency 2.4GHz (Zigbee HA1.2)

Wireless communication distance ≤50m (visible distance)

Buzzer Volume 85db

Sensor operating temperature range -20°C-50°C
