

# Wireless Transmitter

**PB-205R**

**PB-303R**

## Specification

| Overview                 |                                   |
|--------------------------|-----------------------------------|
| Input Voltage            | 220VAC                            |
| Power Consumption        | 2W                                |
| Maximum Current Capacity | 2W                                |
| Maximum Power Capacity   | <500W                             |
| Operating Mode           | Wireless remote control or manual |

| Overview                    |                                       |
|-----------------------------|---------------------------------------|
| Receiving Sensibility       | -113dB                                |
| Wireless Transmit Distance  | ≥1500 meter                           |
| Wireless Receiving Distance | ≥120 meter                            |
| Anti-remove Alarm           | function via built-in Buzzer          |
| Wireless Emitting Power     | <15mW                                 |
| Wireless Emitting Frequency | 433MHz / 868MHz                       |
| Working / Operating Voltage | DC 9 ~ 24V / AC 180V ~ 240V           |
| Working/Operating Current   | 25mA (standby) / 150mA (emitting)     |
| Rechargeable Battery        | built-in up to 8 hours when power off |
| External Power Adapter      | included 15V/1000mA                   |
| Dimension                   | 167*112*40mm                          |
